WORK EXPERIENCE

大筆資訊電商平台 (BigOrder)

Taichung, Taiwan

Software Engineer

June 2020 to Present

- Engineered and maintained full-stack e-commerce platforms, including a scalable ERP system for merchants and an online shop for end customers.
- Developed robust back-end services with Node.js and Hapi.js, integrated with Ember.js front-end for high-performance, user-centric applications.
- Architected data persistence and caching solutions using ArangoDB and Redis, enhancing platform speed, reliability, and scalability.
- Delivered critical features: Zone & Shipping Management, Membership & Reward Systems, and advanced Sales Invoice and Customer Data modules.
- Integrated ERP with payment gateways (payUni) and third-party logistics APIs, including 7-Eleven and Family Mart, automating order fulfillment and streamlining shipping workflows.
- Collaborated in agile sprints and code reviews, contributing technical solutions that aligned business goals with scalable software design.

CV. Karya Hidup Sentosa

Yogyakarta, Indonesia

Software Engineer

Sept 2016 to Jan 2018

- Designed and developed web applications to automate and accelerate core business processes across multiple departments.
- Built server-side systems with PHP and CodeIgniter, integrating with PostgreSQL and Oracle databases for robust, scalable solutions.
- Connected custom applications with Oracle ERP to streamline specialized business workflows and improve data consistency.
- Delivered solutions that increased operational efficiency, automated manual processes, and enhanced company-wide system reliability.

EDUCATION

National Taiwan University of Science and Technology

Taipei, Taiwan

Master of Industrial Management

Graduate in 2020

GPA 3.84 of 4.30. Member of Center of IoT Innovation Research Laboratory in 2018 to 2020

Institut Teknologi Sepuluh Nopember

Surabaya, Indonesia

Bachelor of Computer Science

Graduate in 2016

GPA 3.54 of 4.00. Member of Institut Teknologi Sepuluh Nopember Robotic Team in 2013 to 2014 and join Indonesian Dance Robot Contest (Kontes Robot Tari Indonesia) in 2014

SKILL & INTEREST

Programming Languages

- JavaScript and TypeScript: experience in both company and personal projects. Proficient in Node.js for server-side development.
- PHP: experience in company projects, utilizing frameworks like CodeIgniter and Yii for backend development.
- Python: experience in personal projects, focusing on data processing, prediction, classification, and statistical analysis.

Databases

- Arango DB: Utilized in company projects for multi-model database solutions.
- MongoDB: Experience in handling NoSQL databases for scalable applications.
- MySQL & PostgreSQL: Proficient in relational database management systems for structured data storage.
- Redis: Implemented as an in-memory data structure store for caching and real-time data processing.

Development Tools & Technologies

- Version Control: Experienced with Git, using platforms like GitHub and GitLab for source code management.
- Containerization: Proficient in using Docker for developing, shipping, and running applications.
- Testing Frameworks: Utilized Mocha for unit and integration testing to ensure code quality.

Web Development

- Frontend: Experienced in web development and styling for responsive and accessible web design and using Ember.js and React.js as front-end frameworks.
- Backend: Experienced in building RESTful APIs and server-side logic using Node.js with Hapi.js and Express.js as back-end frameworks.

Publication

- [Two-Stages Occupancy Number Detection Based on Indoor Environment Attributes by Utilizing Machine Learning Algorithm](#), November 2019, National Taiwan University of Science and Technology.
- [Sales forecasting using Holt-Winters in Enterprise Resource Planning at sales and distribution module](#), October 2016, Institut Teknologi Sepuluh Nopember.
