Software Engineer with over 5 years of experience building scalable web applications across Taiwan and Indonesia, including eCommerce, ERP, and data-driven platforms. Experienced in delivering reliable, secure, high-performance, and real-time systems across both frontend and backend. Passionate about solving real-world business problems through clean architecture, automation, system integration, and reliable software delivery.

WORK EXPERIENCE

大筆資訊電商平台 (BigOrdr)

Taichung, Taiwan

Software Engineer

June 2020 to Oct 2025

- Built and maintained e-commerce and ERP systems using Node.js, Ember.js, React.js
- Developed shipping, membership, invoicing, and customer modules
- Integrated systems with third party payment gateway (PayUni) and shipping logistics APIs (7-Eleven, FamilyMart)
- Designed databases and caching using Arango DB and Redis to improve performance
- Supported agile delivery, code reviews, and team collaboration
- Improved system responsiveness and reliability through caching and async job processing

CV. Karya Hidup Sentosa

Yogyakarta, Indonesia

Software Engineer

Sept 2016 to Jan 2018

- Built internal web tools to automate business processes across departments
- Developed backend services using PHP and PostgreSQL integrated with Oracle ERP
- Improved data accuracy and efficiency by replacing manual workflows
- Helped streamline company-wide operations through custom web applications

EDUCATION

National Taiwan University of Science and Technology

Taipei, Taiwan

Master of Industrial Management

Graduate in 2020

GPA: 3.84 / 4.30

Member, Center of IoT Innovation Research Lab (2018–2020)

Institut Teknologi Sepuluh Nopember

Surabaya, Indonesia

Bachelor of Computer Science

Graduate in 2016

GPA: 3.54 / 4.00

Member, ITS Robotics Team (Indonesian Dance Robot Contest 2014)

SKILL & INTEREST

- **Programming Languages:** JavaScript, Typescript, PHP, Python
- **Frameworks:** Node.js (Hapi.js, Express.js), Ember.js, React.js, CodeIgniter, Yii, Django
- **Databases:** Arango DB, MongoDB, PostgreSQL, MySQL, Redis
- **Testing:** Mocha
- **Messaging & Realtime:** RabbitMQ, WebSocket
- **Infrastructure & Tools:** Git/GitLab, Docker, CI/CD
- **Systems:** REST API, multi model data design, background processing, microservices
